

Pole 1000

COMPONENT CHECKLIST

Item	Name	QTY
A	Pole Ø50mm (1.97"), 1000mm (39.37") Long	1
B	Pole End Ring	1

SAFETY BOLT HOLE SIZE AND LOCATION

When drilling new holes always ensure they are diametrically opposite each other so that the bolt can pass straight through.

OPTIONAL TUBE JOINERS

ADM-TX
Tube Extension Joiner

IMPORTANT INFORMATION

Identical safety bolt holes are provided at each end of the tube. Two orientations are provided at 90 degrees to each other so that you can best align your AV equipment with the cable management hole in the ceiling mount or tube joiner.

If tubes are cut to length during installation then these holes should be re-drilled at the equipment end, leaving the original holes for use in the ceiling mount. The tube end ring is then used to cover the sawn end and protect your cables from the rough edge while leaving a clean finish.

Safety bolts are included with all 50mm ADM-T products and **MUST** be set in place before any AV equipment is fitted. It is imperative that a safety bolt is used through all mounts and tube joiners.
